PROJECT UPDATE

The City's Contractor, Bluffs Paving and Utility, is set to begin pavement removal and replacement on Redbud Avenue near Marion Ave and Oak Street on Monday, May 20th. Traffic will be detoured around the area for the duration of the project. Access will be provided for residents along Oak Street, though a detour will still be used during phases of the project.

The Contractor will remove all concrete pavement, prepare the subgrade, and perform any street base repairs within the section before placing the new street pavement.

Access will be restricted at times during construction.
