LOCUST STREET RECONSTRUCTION

PROJECT UPDATE

The Contractor, Western Engineering, is set to begin pavement reconstruction along Locust Street from Sharp Street north through Hazel Street.

Work will include the full depth removal and replacement of the concrete surfacing in all lanes. Work will be performed in phases and will include detour routes to avoid the construction areas. The concrete replacement is expected to last 4-5 weeks, weather permitting. A new asphalt overlay will be constructed following completion of the patch repairs.

Access to the homes and streets will be maintained during the construction process, but may have temporary blockages depending on location of the patches.

Please adhere to the posted detour routes and avoid the area, if possible.
